INRS/ISSA 2016 SYMPOSIUM:

CHEMICALS WITH SPECIAL HAZARDS: OCCUPATIONAL RISKS AND PREVENTION
ENDOCRINE DISRUPTORS AND SENSITISING SUBSTANCES

01-03 June 2016 – Paris, France

RUHR
UNIVERSITÄT
BOCHUM

RUB

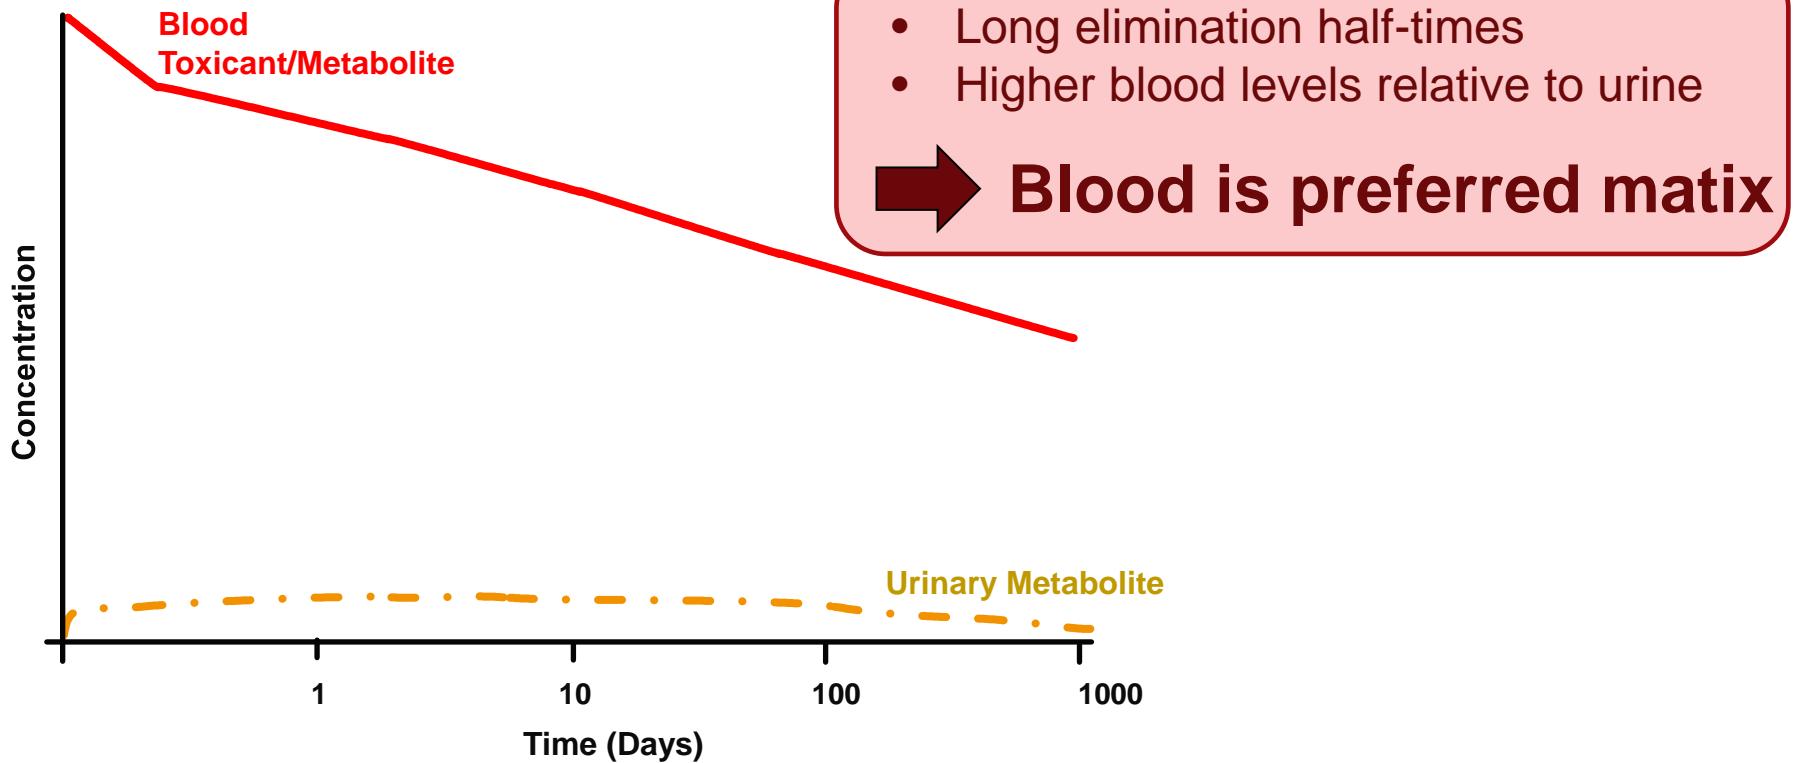

Biological Monitoring:

- via all routes and sources
- no/low contamination (spec. metabolites)

Bio**logical Monitoring**: integral and robust exposure assessment

- Back-calculation of daily intake
- chemicals that actually entered the human body
- Comparison with health toxicity benchmarks
(TDI, RfD, NOAEL ...)
- via all routes and sources
- no/low of contamination (spec. metabolites)
- Cumulative risk assessment (multiple chemicals)

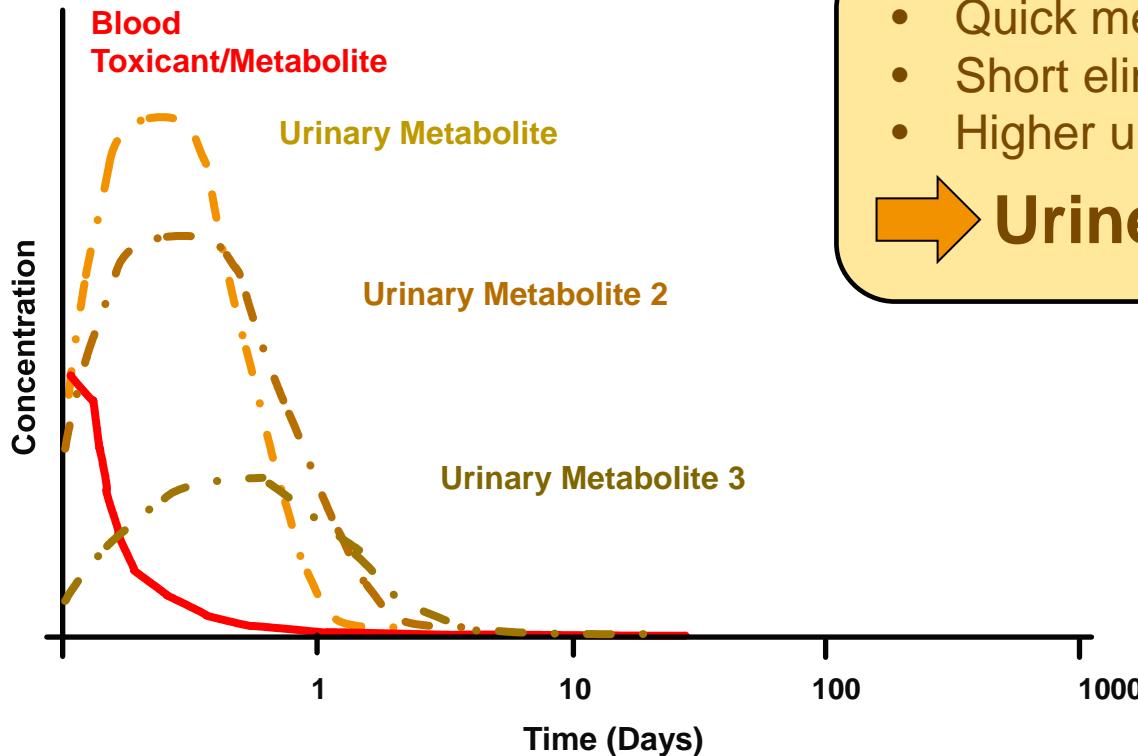

Toxikokinetics: *persistent chemicals*

Slides taken from ISEA/ISES Wesolowski Award Presentation, Paris 2006:
Biomonitoring: An Integral Part of Exposure Analysis
Larry L. Needham, Ph.D., CDC, Atlanta

Needham and Sexton. JEAEE 10: 611-629 (2000)
Henderson et al. Crit Rev Toxicol 20: 65-82 (1989)

Toxikokinetics: non-persistent chemicals

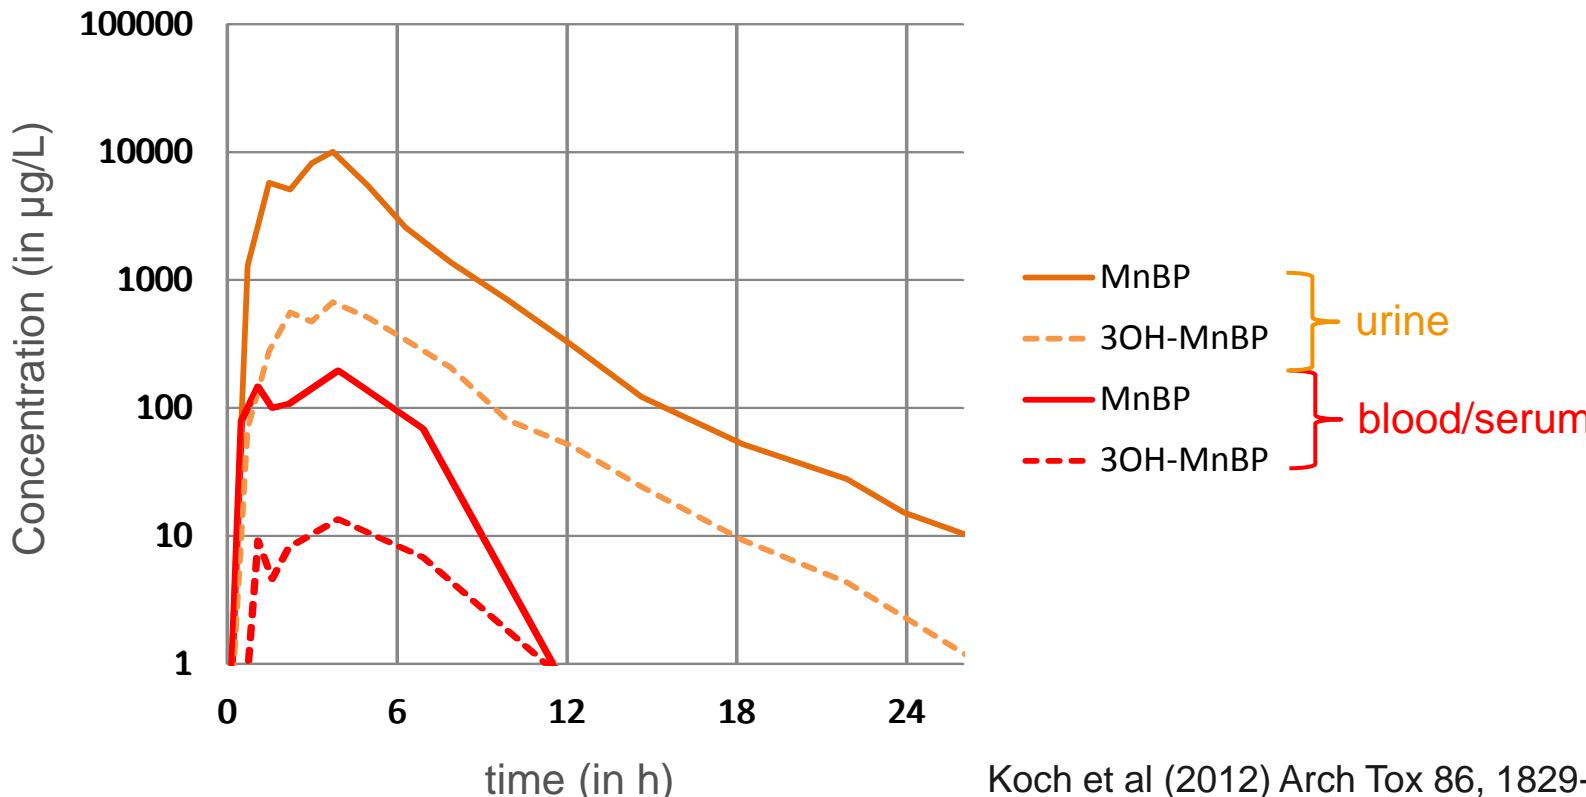

- Quick metabolism
 - Short elimination half-times
 - Higher urine levels relative to blood
- Urine is preferred matrix**

Slides taken from ISEA/ISES Wesolowski Award Presentation, Paris 2006:
Biomonitoring: An Integral Part of Exposure Analysis
Larry L. Needham, Ph.D., CDC, Atlanta

Needham and Sexton. JEAEE 10: 611-629 (2000)
Henderson et al. Crit Rev Toxicol 20: 65-82 (1989)

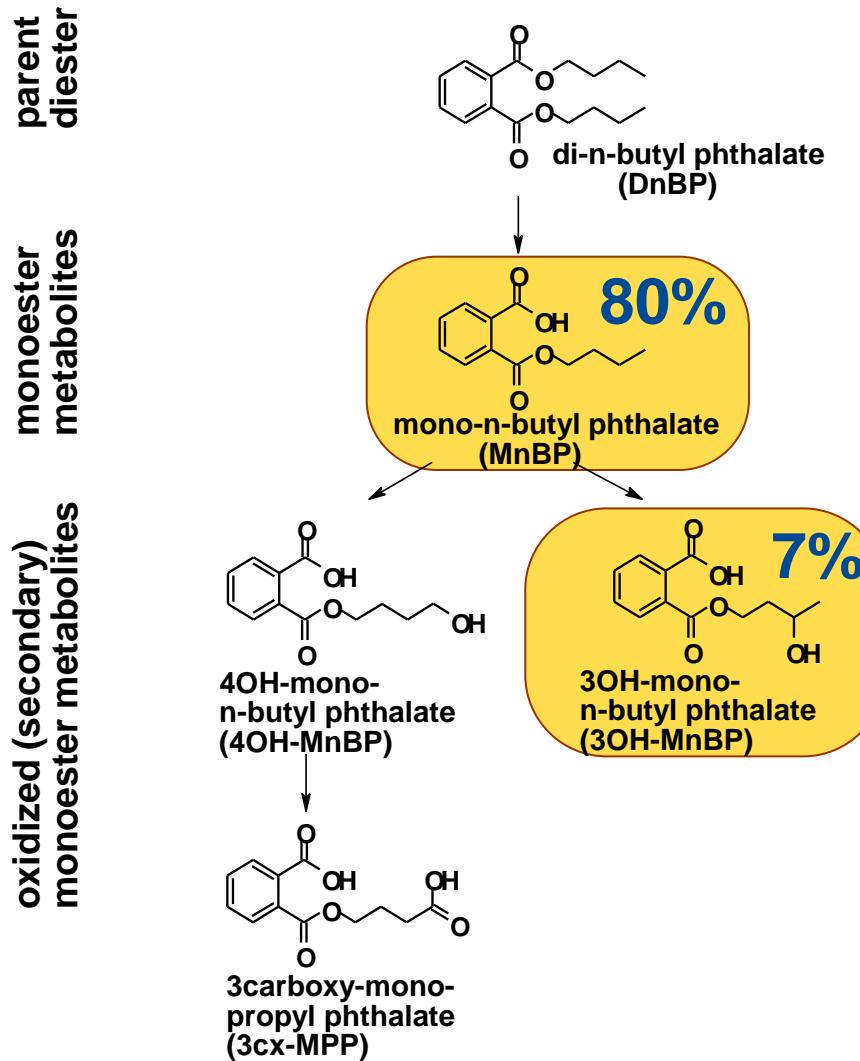

Toxikokinetics: Di-n-butyl phthalate (DnBP)

5mg D4-DnBuP (oral, one human volunteer)

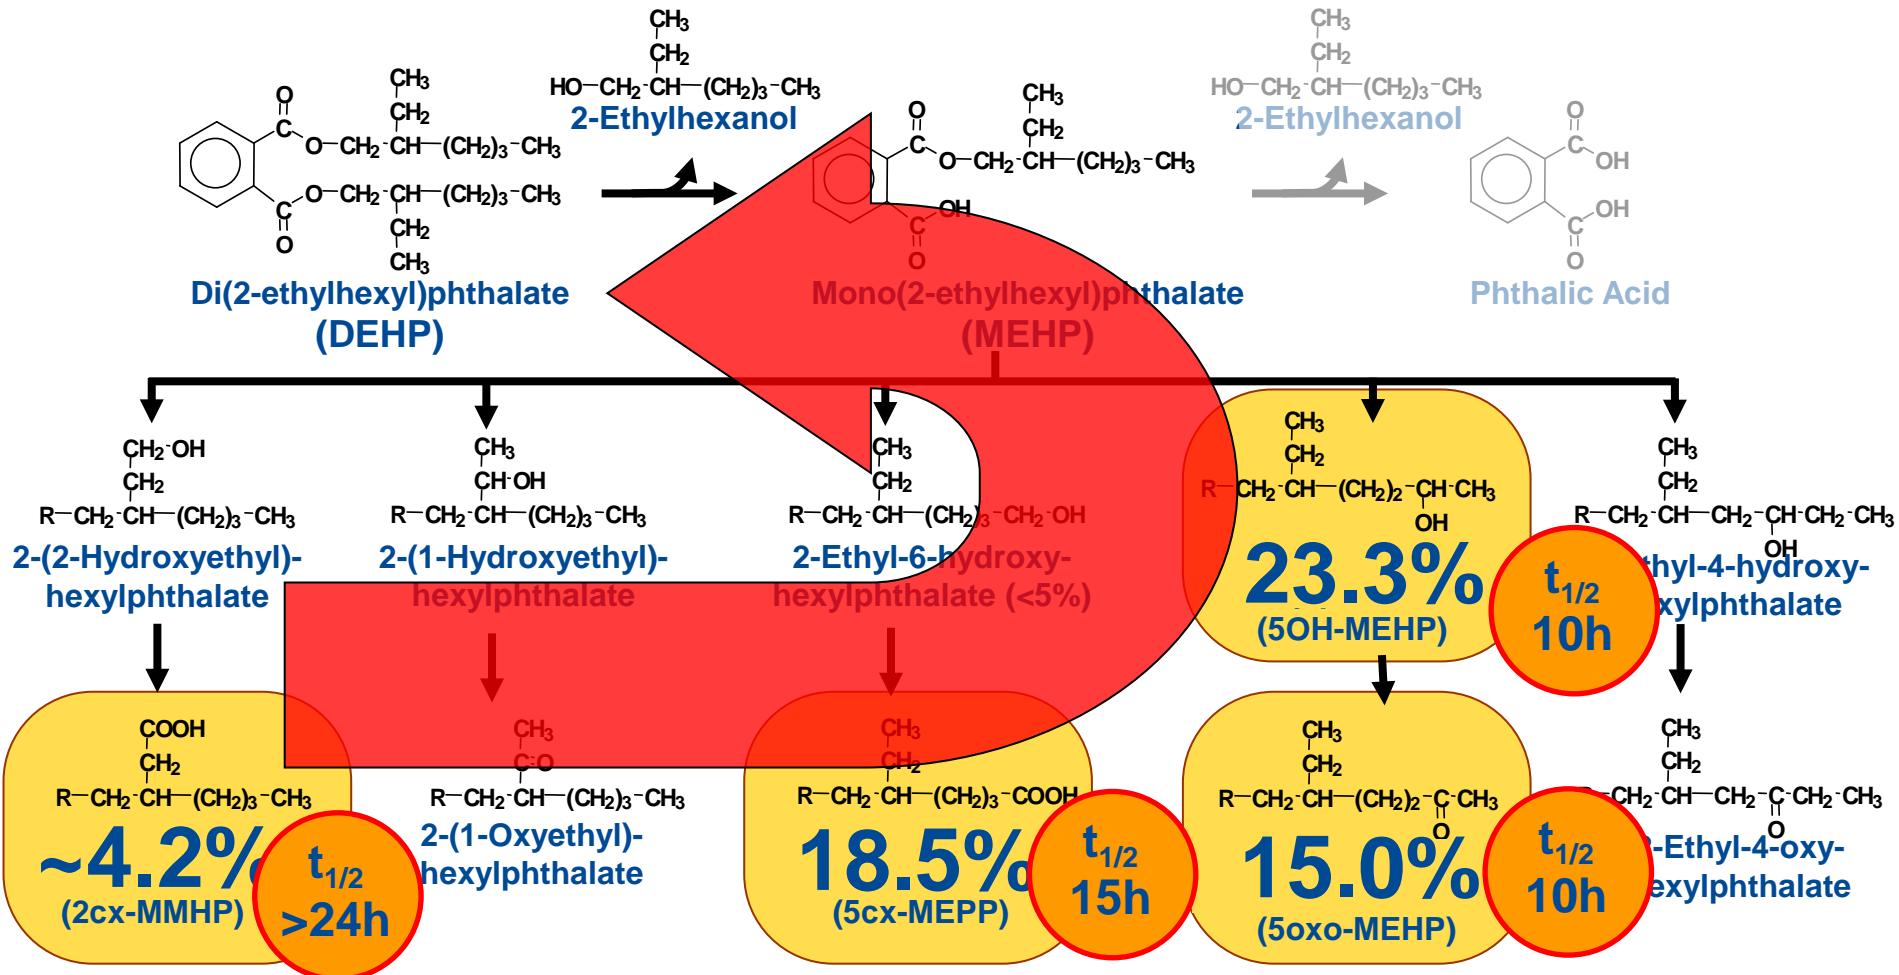

Koch et al (2012) Arch Tox 86, 1829-1839.
Lorber and Koch (2013) Environ Int 59, 469–477.

Biomarkers for DnBP

Koch et al (2012) Arch Tox 86, 1829-1839.
Lorber and Koch (2013) Environ Int 59, 469–477.

Biomarkers for DEHP

Koch et al. (2004) Arch Toxicol 78, 123-130.
Koch et al. (2005) Arch Toxicol 79, 367-376.

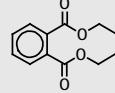

low-molecular weight phthalates

parent phthalate

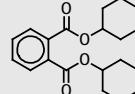

Dimethyl phthalate (DMP)

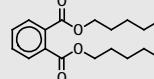

Diethyl phthalate (DEP)

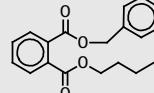

Di-cyclohexyl phthalate (DCHP)

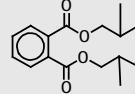

Di-n-pentyl phthalate (DnPnP)

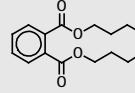

Butyl-benzyl phthalate (BBzP)

Di-iso-butyl phthalate (DiBP)

Di-n-butyl phthalate (DnBP)

primary metabolite (hydrolytic monoester)

Mono-methyl phthalate (MMP)

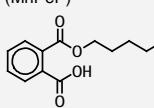

Mono-ethyl phthalate (MEP)

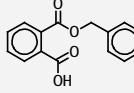

Mono-cyclohexyl phthalate (MCHP)

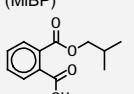

Mono-n-pentyl phthalate (MnPnP)

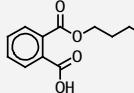

Mono-benzyl phthalate (MBzP)

Mono-iso-butyl phthalate (MiBP)

Mono-n-butyl phthalate (MnBP)

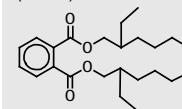

secondary metabolite (oxidised monoester)

n.a.

high-molecular weight phthalates

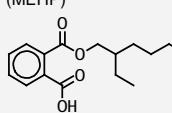

parent phthalate

Di(2-ethylhexyl) phthalate (DEHP)

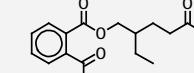

primary metabolite (hydrolytic monoester)

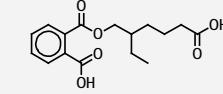

Mono(2-ethylhexyl) phthalate (MEHP)

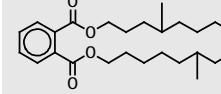

5oxo-Mono(2-ethylhexyl) phthalate (5oxo-MEHP or MEHHP)

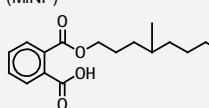

5carboxy- Mono(2-ethylhexyl) phthalate (5cx-MEHP or MECPP)

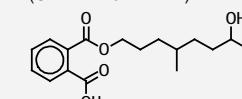

Di-iso-nonyl phthalate (DiNP)[†]

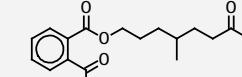

Mono-iso-nonyl phthalate (MiNP)[†]

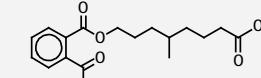

7OH-Mono-methyloctyl phthalate (OH-MiNP or MHINP)

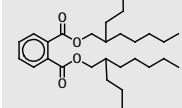

7oxo-Mono-methyloctyl phthalate (oxo-MiNP or MOiNP)

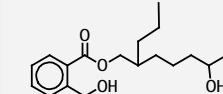

7carboxy-Mono-methylheptyl phthalate (cx-MiNP or MiOP)

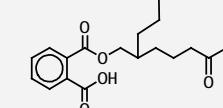

Di-iso-decyl phthalate (DiDP)[†] and Dipropylheptyl phthalate (DPHP)

6OH-Mono-propylheptyl phthalate (OH-MPHP, OH-MiDP or MHidP)

6oxo-Mono-propylheptylphthalate (oxo-MPHP, oxo-MiDP or MOiDP)

EU Classification

Phthalate	Chain-length
DMP	1
DEP	2
DiBP	4
DnBP	4
BBzP	4-6
D-i/n-PeP	5
D-i/n-HexP	6
DEHP	8
DiNP	8-10
DnOP	8
DiDP	9-11
DPHP	10

H360D: May damage the unborn child

H360F: May damage fertility ; H360f: Suspected of damaging fertility

Phthalates: Reproductive Toxicity

EU Classification

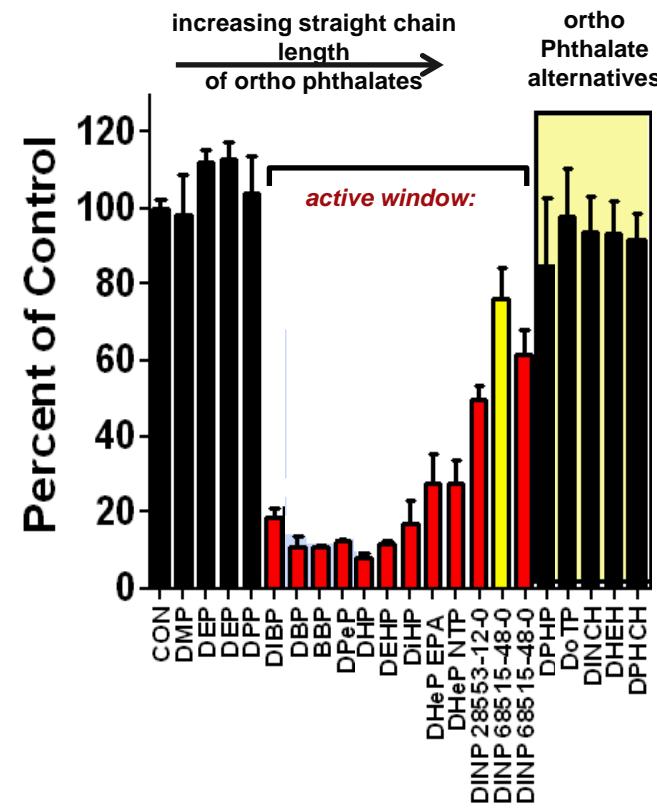

Phthalate	Chain-length	Classification (year)
DMP	1	-
DEP	2	-
DiBP	4	Repr. 1B (2009)
DnBP	4	Repr. 1B (2001)
BBzP	4-6	Repr. 1B (2001)
D-i/n-PeP	5	Repr. 1B (2004)
D-i/n-HexP	6	Repr. 1B (2013)
DEHP	8	Repr. 1B (2001)
DiNP	8-10	-
DnOP	8	-
DiDP	9-11	-
DPHP	10	-

H360D: May damage the unborn child

H360F: May damage fertility

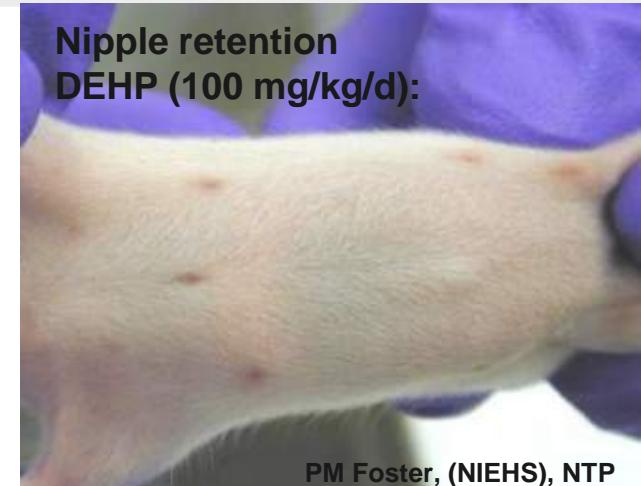

Potency

Reduction of Testicular Testosterone Production

(Furr et al. (2014) Tox Sci 140:403-424.
Earl Gray, personal communication)

The ‘Phthalate-Syndrome’

DEHP (250 mg/kg/d):

Cryptorchidism
PM Foster, (NIEHS), NTP

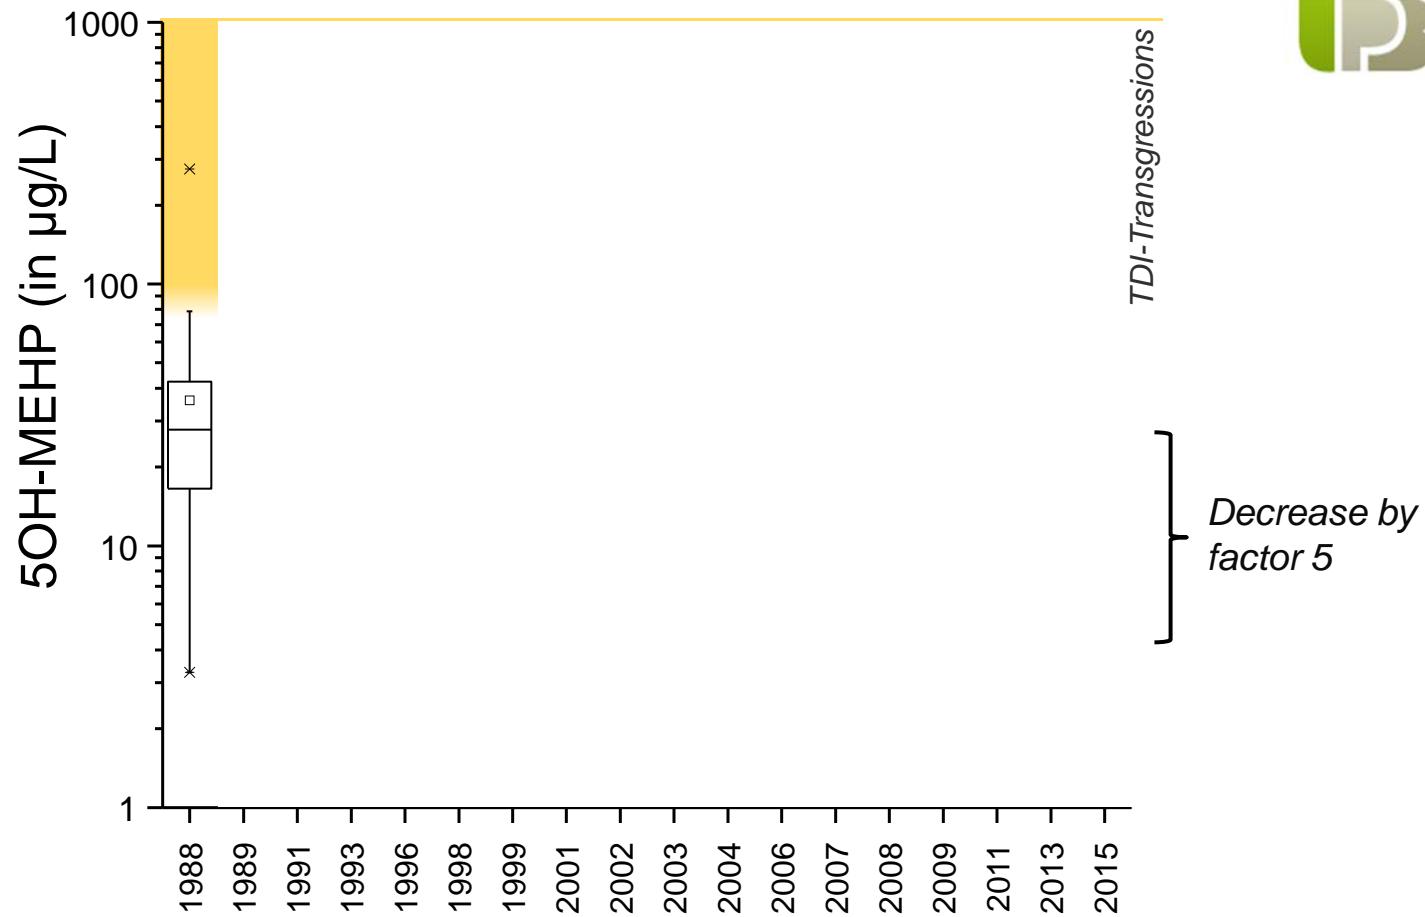

German Environmental Specimen Bank

Collection of human samples (24h urines) since the early 1980's

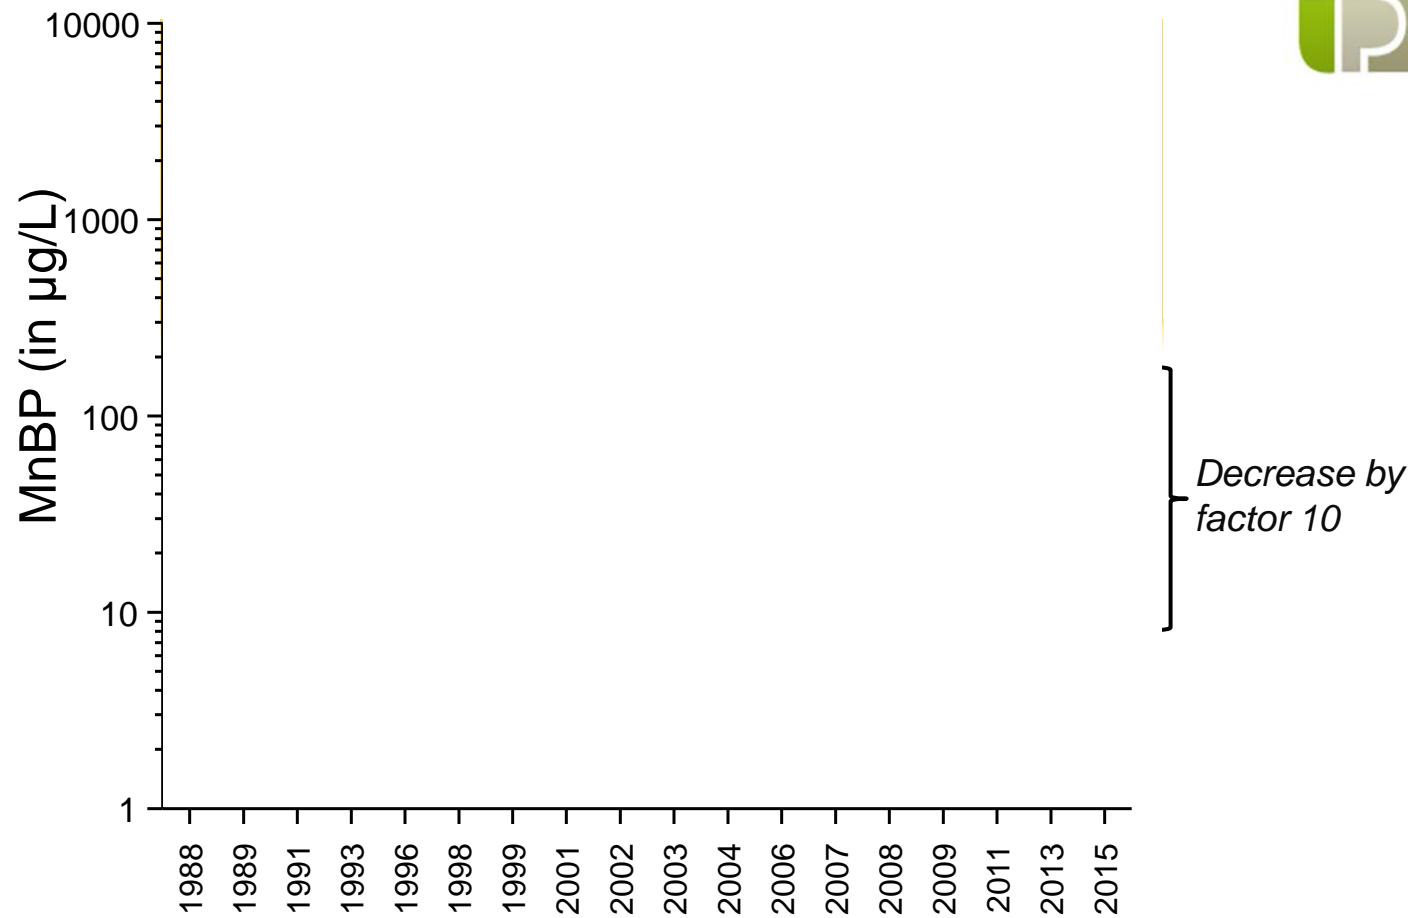

- ➡ Time trend analyses
- ➡ Daily intake calculations / risk assessment

Time Trend DEHP Exposure

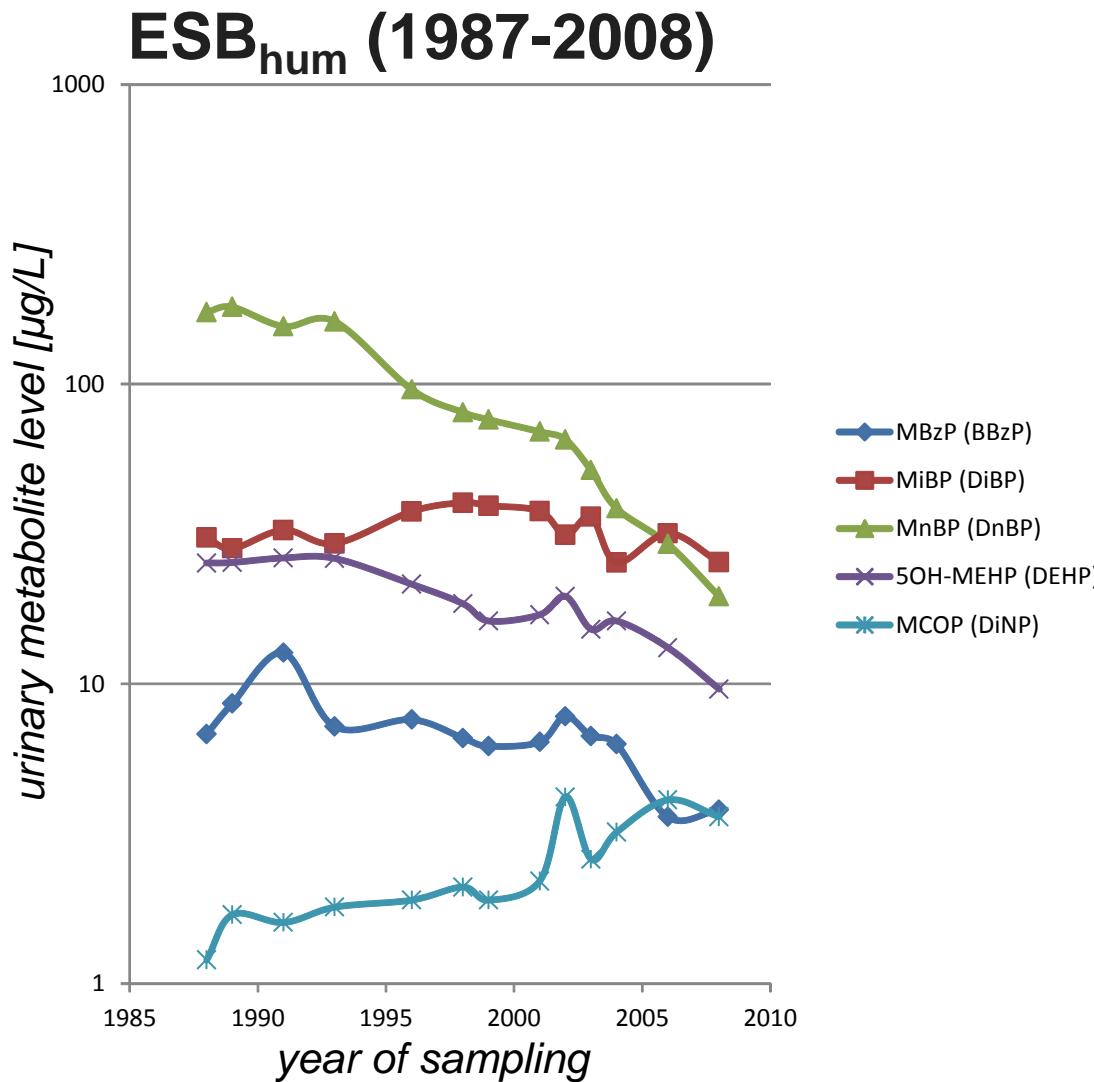

● UMWELT
● PROBENBANK
● DES BUNDES

Time Trend DnBP Exposure

Production of flexible tubes and hoses

Plastisol/Underbody Coating

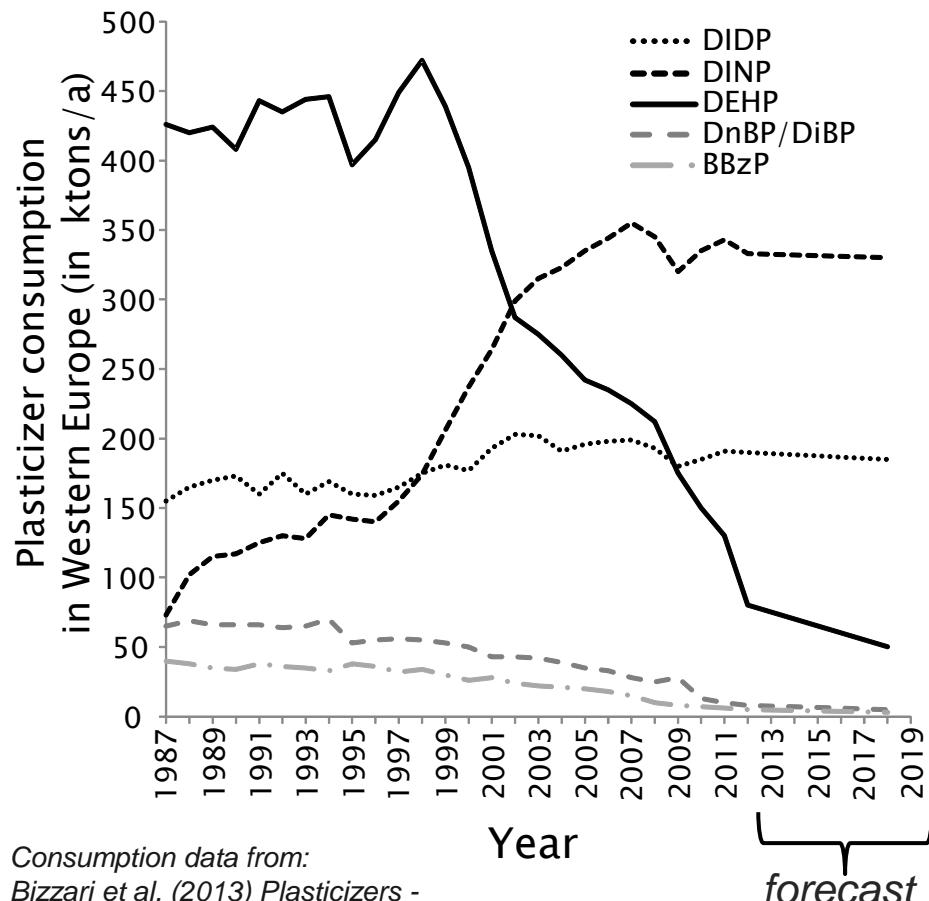

PVC/Phthalates in automobiles

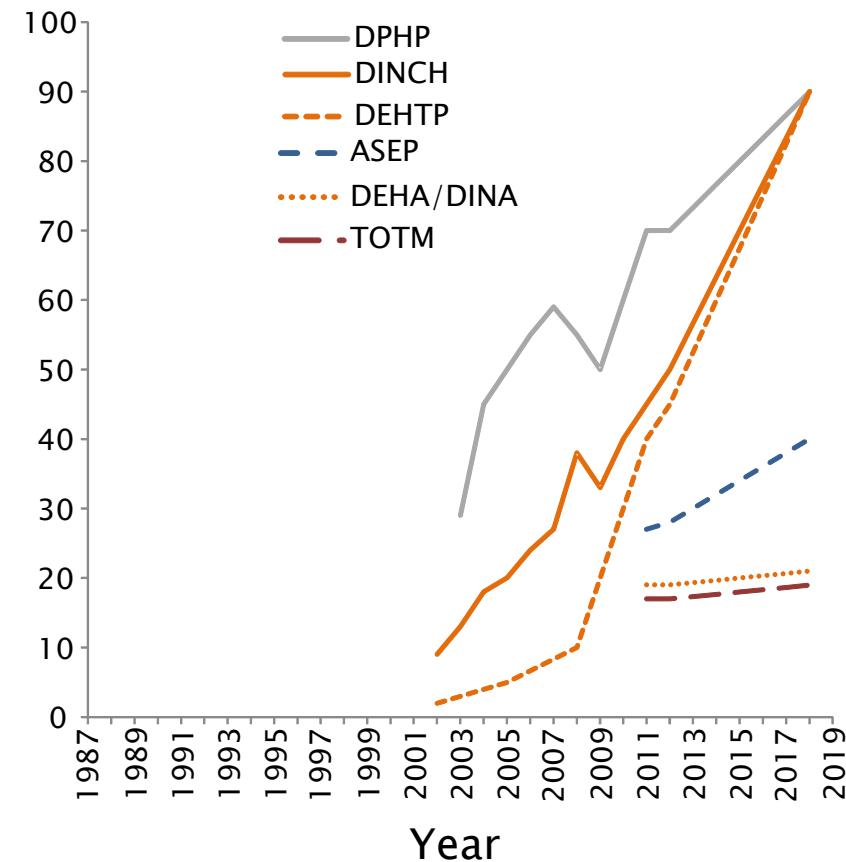

Koch HM et al. (2012)
Toxicol Lett. 213(1):100-6.

Substitution of Phthalates

Rapidly changing phthalate/plasticiser market

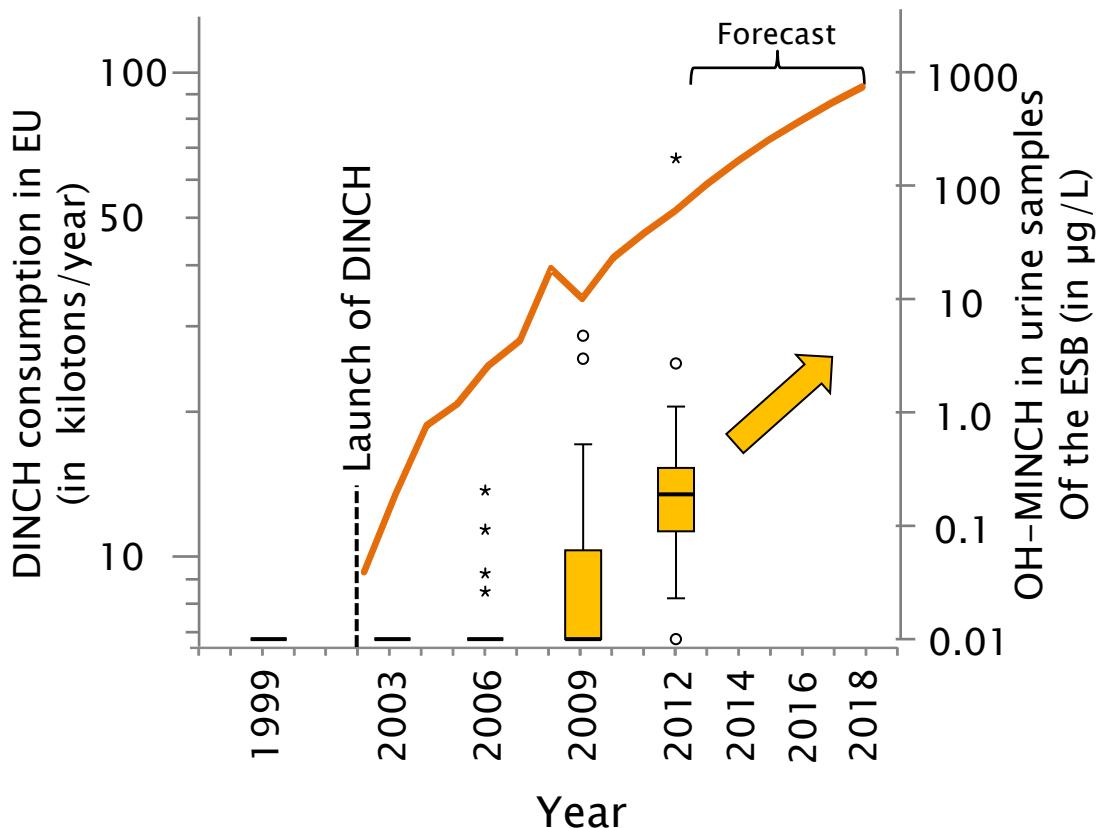

Consumption data from:
Bizzari et al. (2013) Plasticizers -
IHS Chemical Economics Handbook

Substitution of Phthalates

Hexamoll® DINCH®

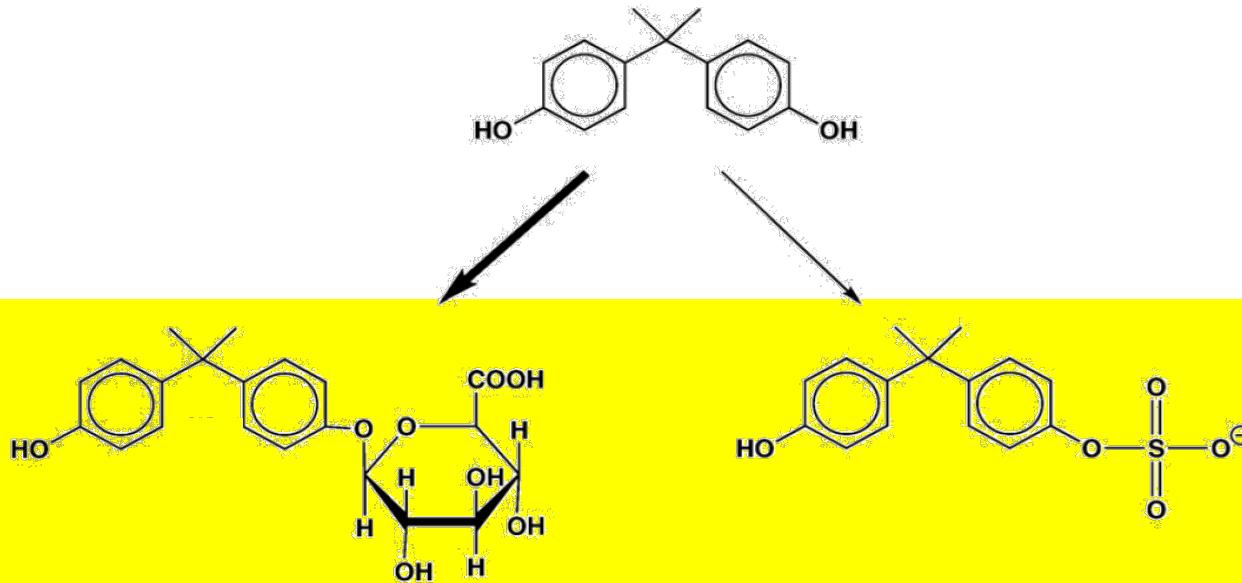

Exposure to DINCH
is omnipresent
and increasing

But:
Current exposure
far below TDI / HBM I

Schütze et al. (2015) Chemosphere 128, 216–224

Bisphenol A (BPA) : Biomarker

24 h V

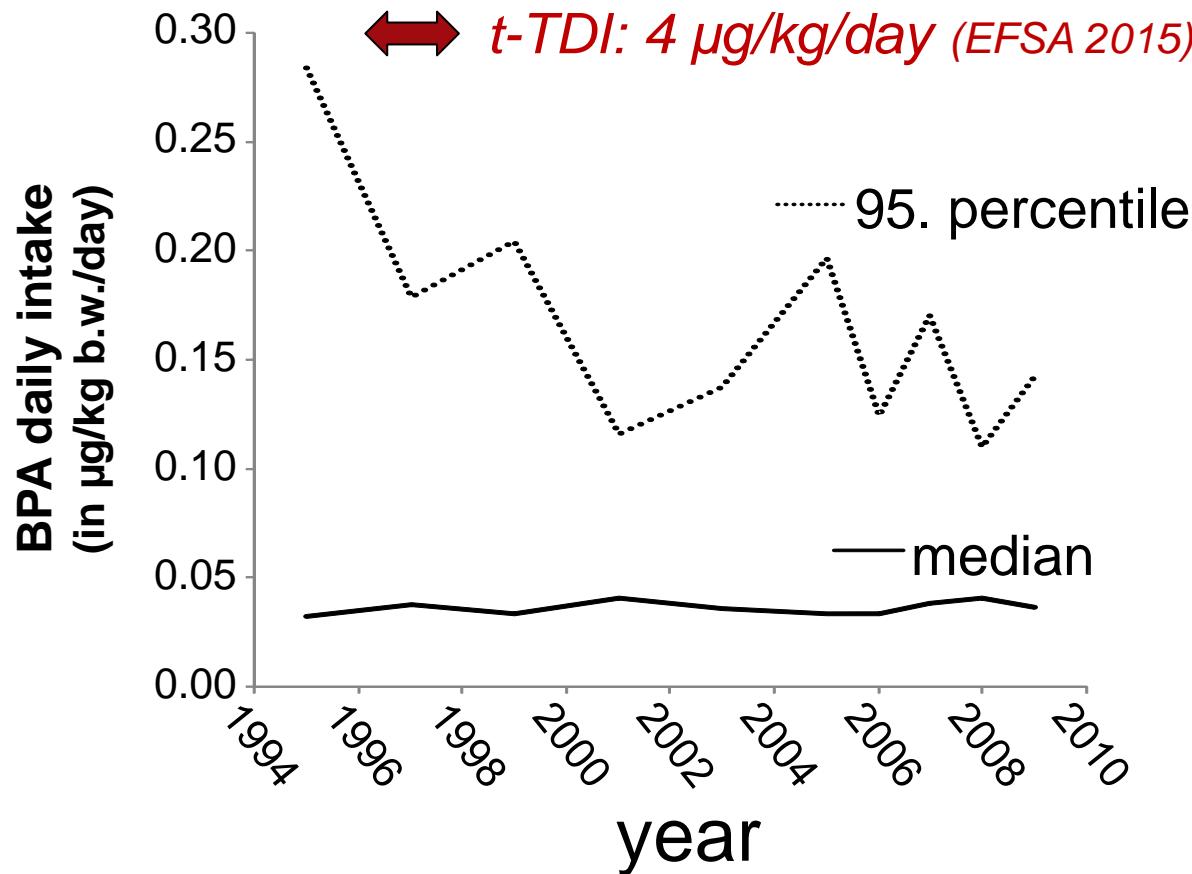

- fast conjugation (close to 100%)
- fast elimination in urine

- blood levels very low
- contamination issues with BPA in blood

Calafat AM et al. (2015)
Environ Health Perspect. 123 (7), A166-A168

Bisphenol A (BPA) : Population Data

Comparable data from
US (NHANES)
and Canada (CHMS)
